Subcommittee Reports:

Residential / Mixed Use / Commercial Subcommittee Action Items (30min) (Chris Olson)

Project(s):

#161894 860 Agate Map Waiver: A Map Waiver to waive the requirement for a Tentative Map to convert two existing residential units to condominiums and a Waiver from the requirement to underground overhead utilities. 7,248 sq ft site in the RM-1-1 zone.

#131201 1142 Garnet Avenue. This is an existing 25' wide lot with commercial on the front, apartment on the second floor and parking behind. The applicant came before the PBPG in February 2008 with a proposal for a mixed use project with expansion of the residential component. It was deemed not feasible due to parking requirements and the constraints of a 25' wide lot. The applicant again came before the PBPG in February 2008 with a proposal to maintain the existing commercial space, change the living unit to personal storage and construct a 2 story personal storage structure in the back with 2 parking spaces. The subcommittee gave mixed reviews of the idea for personal storage and it is apparently feasible to meet zoning requirements. The primary recommendation from the subcommittee was to improve the façade on Garnet Avenue in accordance with the community plan. A has been submitted to the City and the project is again before the PBPG.

Subcommittee Reports (Action Items): (@ 5 min)
